# Release Notes

Version: 4751300

## New Features

- New daily invoice report showing the transaction number and time, along with customer contact information.
- New customer shopping basket analysis report showing products purchased, quantities, transaction value and customer contact information.

## New Configurations

- Added a new option to select DataCandy Prepaid as the default gift card type.

## Improvements

- The “Close” button has been removed from the cash drawer closing steps to avoid confusion.
- The Number field is now disabled when activating a DataCandy Prepaid gift card.
- The net weight and unit of measure of bulk items sold by weight are now displayed on invoices, in compliance with Measurement Canada requirements.

## Fixes

- Fixed an issue that allowed the names of master entries to be edited in network systems.
- Fixed an issue that applied the discount a second time when editing an order containing a service.
- Fixed an issue that changed the sale price when editing an order.
- Non-admin users can no longer enter a discount directly in the invoice discount field.
- The total profit margin percentage is now calculated correctly in the STA Items Sold and Simplified STA Items Sold reports.
- Fixed a display issue with returned GST and QST amounts in the Sales Tax report.
- Refunds made on billing invoices are now included in the Accounting Posting report.
- Fixed an issue that prevented editing the price when finalizing an order.
