

New Features

- Added an option to retain the Alice code for transferred items. This option is available under Configuration → Invoicing → Page 4 → Keep the same Alice code during transfer.
- Added an option to display limited availability in the global search for remote stores. This option is available under Configuration → Inventory → Show limited availability.

New Configurations

- Added an option to perform inventory transfers at cost.
- Added a system configuration option to prevent invoice cancellations.

Improvements

- Several improvements and optimizations related to system performance.

Fixes

- Fixed an issue where the sale price was not adjusted after removing membership benefits.
- Fixed a display issue affecting negative inventory items with promotions on full-page invoices.
- Fixed the CSV export for the stock count (scratch-off) report.
- Bulk items now display the correct price paid on receipts.
- Fixed an issue with cancelling credit line payments.
