

Release Notes

Version: 4560200

New Integration: Alice in now integrated with Raange, a Marketing Engagement Platform. Your client's contact information will be sent to that platform which you can then use for SMS and Email marketing campaigns.

Improvements: Clicking the + button in the kit configuration window will no longer add an empty line if nothing is selected. The ENTER key now acts differently depending on the presence of a selection. The hint on the + has been corrected.

Improvement: An option has been added (Invoice -> Page 4) to show the add attachment window when finalizing all invoice types instead of only Supplier Purchases. The issue affecting the save function has been fixed.
